

# Catalina Island Naturalist Training

**Wednesday, March 18, 2020, 3 - 5 pm**

Come learn about the island just off the coast! Please join us as members of the Catalina Island Conservancy teach us about Catalina's geologic formation, unique Island species, cultural history, and current land management practices. And for anyone participating in the international City Nature Challenge in April, this is a great way to learn how to spot wildlife!

**For adults**
